World Best Performances miles

Once many official World Records were registered/recognised on the MILE-distances. However, the records mostly were deleted about 1937. And rankings and registrations had not been made after the 1st. of January 1961. At the same time the registrations of performances of 3, 4, 5, 6, 12 and 24 hours stopped. In the future, therefore, only the ONE MILE-distance performances will be registered and published.
